DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 8-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Dow (6,232,829).

Dow discloses a bandgap voltage reference circuit with an increased difference voltage in Figs. 3-12. A circuit for producing a reference voltage (300) between a first node and a second node a resistive element (R3) and a junction device (Q5) coupled in series between the first node and the second node, wherein the junction device includes a junction and has a negative temperature coefficient (col. 7, lines 33-38), a first and a second current sources (310 and 318) to route respectively a first and a second bias currents (I1- I3) to the resistive element (R3) and to the junction device (Q5) such that a resulting first branch current through the resistive element is unequal to a resulting second branch current through the junction device (col. 8, lines 10-12) wherein the first bias current has a different manufacturing process variation dependence than the second bias current (col. 8, lines 13-17) wherein the second bias current is larger than the first bias current wherein the first current source is adapted to transmit the first bias current through the resistive element, and the second current source is adapted to transmit the second bias current through the junction device for

biasing the junction, without transmitting the second bias current through the resistive element (col. 11, lines 1-56).

Allowable Subject Matter

3. Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record disclose or teach a circuit for producing a reference voltage with a third current source to extract a drained current from the intermediate node.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
